

COMPUTER VISION WORKSHOP

JUNE 7, 2010

Computer Vision is a new and eclectic field drawing on methods of computer science, mathematics and image processing. Broadly speaking, the purpose of the field is the transfer of human visual perception to the computer. In this one day workshop we give a general and brief account of the efforts of the IPM Vision Group with special emphasis on the group's vision for future research. The scope includes machine learning, image understanding, object, motion and action recognition, shape analysis, 3D-reconstruction, content based image retrieval and medical applica-

Workshop information

The workshop will be held on **Monday Khordad 17, 1389**, from 10:30 am to 18:00 at **IPM**. There will be a break for lunch and several shorter breaks between lectures for discussions.
