To whom It may Concern:

I have had the pleasure of knowing Mr. Vaezi almost 13 years. Our academic relationship started 13 years ago when he took the “Computational Geometry” course with me. He was among top 3 by getting 19 out of 20 in my class including 15 graduate students. 12 years ago I was co-supervising his thesis with title “Expanding Visibility Polygons by Mirrors”. He dedicated a lot of his time to his thesis and got some nice theory results which are appropriate to be published in a good quality journal. I must mention that he finished his P.h.D. with excellent grade. I believe he possesses excellent intellectual abilities combined with a deep understanding of basic concept in computer science. Through his interaction in the last 13 years I found him to be very active, committed, smart, enthusiastic, keen, and mature in pursuing his academic goals. His academic records with excellent GPA indicate that he is among the outstanding students in the nation.

I do believe that Mr. Vaezi, with his excellent academic background, great aptitude for research, and perseverance, will be a great addition to any graduate program in a research-oriented institution. Therefore, I do not hesitate to strongly recommend him for admission to your Postdoc program.

Sincerely Yours,
Mohammad Ali Abam
Associate Professor, Sharif University
