

To whom it may concern;

It is with enthusiasm that I am writing a recommendation letter to support Dr. Bahereh Hassanpour who wishes to apply for a postdoctoral position in the School of computer science at IPM.

I have known Bahereh for many years, when she started her Ph.D. in the School of electrical and computer engineering, at the University of Tehran. She was among the brightest Ph.D. candidates who were accepted in computer architecture group. She has done her Ph.D. under the supervision of Professor Khonsari, and to my opinion she was among the strongest candidate of the department. Dr. Hassanpour has a strong background in computer engineering and is an excellent researcher with many good publications. She has helped supervise many MS.c. students successfully.

Her character is really exceptional. A very positive and proactive person who helped other students and improved the everyday atmosphere of the lab. She has good industrial experience and has proved her steady and energetic efforts toward her goals.

Therefore, I strongly and with enthusiasm support her application and am sure that she will do great research at IPM.

Yours Sincerely,

Siamak Mohammadi, Ph.D
Associate Professor
Chair of computer architecture group,
School of Electrical and Computer Engineering, University of Tehran
