

To whom it may concern,

I am writing this letter to give my highest possible recommendation for Mr. Mojtaba Farmani to be considered for the DAAD Scholarship. I have known Mojtaba for about three years and I have noticed an inherent interest in learning and grasping the gist of topics relating to the field of networking in him. During his bachelor studies, he took the courses Computer Networks, System Modeling and Simulation and Advanced Topics in Networking with me and was amongst the top three students of my class.

Mr. Farmani has a good theoretical background in the field of Distributed Systems and Network-based Computing which are augmented with considerable practical experiences. Being greatly inspired by his academic accomplishments and during accomplishment of his BSc thesis under my supervision, he has shown great appetite for doing high quality research and publishing papers in journals and top conferences in the field.

In summary, I have found Mojtaba a hard working, self-motivated, dedicated, and capable research student. While he has no trouble to work in a group, he can also work well on his own. Given Mr. Farmani's qualities as an intellectual and academic student, I feel confident that he will be successful in his future endeavors. Therefore, I have no hesitation to highly recommend Mojtaba for studying in your department, and am sure he will be a successful student.

If you would like to discuss this further, please feel free to contact me

Yours sincerely,

ابوالفضل ديان
