***To Whom It May Concern***

This letter of recommendation has been written in support of **Dr. Ehsan Tanghatari** who is applying for a position at your institute. I have known **Ehsan** since **he** enrolled into our Ph.D. program in 2017. **He** passed two graduate courses, namely, “*Low Power Integrated Circuits*” and “*Memory Technologies, Circuits, and Systems*” with me obtaining very good grades, due to **his** great performances in the exams as well as in the course projects. Also, **Ehsan** was my chief TA for my Electronics 2 course in Fall 2018 and Fall 2019 and did an excellent job. **Ehsan** did **his** Ph.D. dissertation on “*Providing a structure for distributing neural network learning over the edges of the IoT*” under the supervision of my former colleague, Dr. Mehdi Kamal, and myself. **He** did an excellent job in performing **his** research where the results have been published in two IEEE journal papers. In August 2023, **Ehsan** successfully defended **his** dissertation.

Based on my interactions with **him**, I have found **Ehsan** a talented and hardworking person with a very nice personality. I, therefore, strongly recommend **him** for the position.

Sincerely yours,

Ali Afzali-Kusha

Professor

School of Electrical and Computer Engineering

University of Tehran

North Kargar Ave.

P.O. Box 14395/515, Tehran, Iran
