Letter of Support for Ms. Mona Hashemi

I am writing to offer my strongest support for Ms. Mona Hashemi's application for a postdoctoral fellowship. Mona has pursued her studies at some of the top universities in Iran, including K.N. Toosi University of Technology, where I first met her as an undergraduate student in September 2008. Over the years, I have collaborated closely with her on numerous projects, and she has consistently demonstrated remarkable motivation, talent, and a deep commitment to achieving excellence in team-based work.

Mona and I completed our Bachelor's thesis on "Design and Implementation of a Heliostat System based on a Solar Tracker", which proved to be a very successful project. After that, we had another collaboration on the research project "Designing Fast and Energy Efficient CNTFET Full Adders", which led to the successful publication of two peer-reviewed papers: one in IEEE Transaction on Nanotechnology ([Link](#)) and the other in International Conference on Computing, Communication and Networking Technologies (ICCCNT) ([Link](#)). More recently, we have been engaged in projects focusing on "Metastable Failure in Distributed Systems" and "Energy-Aware DNN Training," demonstrating her versatility and dedication to high-impact research.

Mona possesses a robust background in computer architecture and design-for-security solutions. She has a clear focus on continuing her academic journey in these areas, and I am confident that a postdoctoral position will allow her to make significant contributions to the field.

In conclusion, I am extremely supportive of Mona's application. This opportunity would be invaluable for her as she advances her academic career. Please feel free to contact me should you need any further information regarding her application.

Yours sincerely,

Kawsar Haghshenas
